

Developer Experience Engineer for Inference – EMEA Remote

Description

Here at Hugging Face, we're on a journey to advance good Machine Learning and make it more accessible. Along the way, we contribute to the development of technology for the better.

We have built the fastest-growing, open-source, library of pre-trained models in the world. With more than 1 Million+ models and 320K+ stars on GitHub, over 15.000 companies are using HF technology in production, including leading AI organizations such as Google, Elastic, Salesforce, Grammarly and NASA.

About the Role

As a Developer Experience Engineer, you will play a key role in expanding the adoption of our inference services. This position involves working collaboratively across various teams, including Open Source, Product, and Infrastructure, to enhance the overall developer experience.

In day-to-day, this role can involve:

- Engaging Demos and Prototypes: Design and develop demos and prototypes to effectively showcase the latest research and how to use it from a developer perspective.
- Technical Content Creation: Produce high-quality technical content, such as documentation, blog posts, tutorials, and documentation, to support and educate our user community.
- Tooling Development: Create and improve tools to lower the barrier of entry for developers using our inference services.
- Ecosystem Integration: Own, unify, and grow the tooling and its adoption within the developer ecosystem.
