

Senior Full Stack Developer – Machine Learning/AI (m/w/d) – Ramboll Tech

Description

Job Description

Are you an experienced Full Stack Developer? Do you have demonstrable experience working with ML frameworks or LLMs? Are you looking for an opportunity to constantly learn and evolve in a flexible, scandinavian inspired working environment?

Then you could be our next Senior Full Stack Developer who turns ideas into solutions which change how Ramboll interacts with data and AI.

Join our team as a Senior Full Stack Developer at Ramboll Tech and help transform Ramboll!

Your new team

Ramboll Tech is our internal business that accelerates work with innovation and digital transformation projects and controls all AI initiatives within the company. This includes collaboration with our markets around their AI projects, working on larger change processes in the group as well as the development of our own AI products for Ramboll and our clients. Our team consists of over 50 employees from Denmark, Germany, the USA, and India. In Germany, we currently have around 15 employees.

Your role and responsibilities:

You will work in our 5 people (and growing!) development team on building AI and data-based solutions that the larger organization relies on in their daily work

- You will write Python for backend and React/Typescript for frontend
- You will be part of a scrum team building and maintaining a solution over the whole lifecycle
- You will collaborate with international colleagues from the Ramboll business units and help making their ideas come to life
- Ramboll Tech will continue to grow – you are actively involved in this

About You

From the moment you start at Ramboll, we will support your personal and professional development so that you can continue to grow with the company. Whilst we look forward to supporting your continued learning and development, for this role we have identified some qualifications, skills, and capabilities that will set you up for success:

Employment Type

Full-time

Beginning of employment

asap

Job Location

Hamburg, Germany

Working Hours

40

Base Salary

euro EUR 57K - 106K *

Date posted

June 6, 2024

- You have solid experience in developing in Python (ideally using FastAPI) and Typescript/React
- You have worked with SQL and ideally vector databases
- You are familiar with Docker, CI/CD and know how this can be brought together in the Azure cloud
- You ideally have fought (and won!) with the Azure cloud and its AI solutions
- You want to continuously learn and work in an interdisciplinary team
- You are able to solve problems independently and confident to ask essential questions
- Ability to speak German is a plus

We encourage you to apply even if your profile does not meet all the requirements for the role. We are looking for a diverse range of experiences, skills, and interests to enrich our team.

We kindly request that applicants are based in a European time zone, preferably close to one of our offices.

What we can offer you

Our team at Ramboll Tech is currently on a steep growth path. In doing so, we have always maintained our strong team culture.

We take time every day to exchange ideas and discuss our priorities at work. We support each other in facing challenges and live with a strong team spirit. We strive to continually learn from one another and to grow. We value diversity and, although we are certainly not perfect, we regularly have open discussions on how we can improve in this area.

Our current hybrid work approach focuses on adapting to different needs, including increased flexibility that works best for our teams and individuals, with as much self-determination as possible. We also meet in person regularly, for example, at our twice-yearly off-site events or at regular team dinners.

About Ramboll

Founded in Denmark, Ramboll is a foundation-owned people company. We have more than 18,000 experts working across our global operations in 35 countries. Our experts are leaders in their fields, developing and delivering innovative solutions in diverse markets including Buildings, Transport, Planning & Urban Design, Water, Environment & Health, Energy, and Management Consulting. We invite you to contribute to a more sustainable future working in an open, collaborative, and empowering company. Combining local experience with global knowledge, we together shape the societies of tomorrow. Equality, diversity, and inclusion is at the heart of what we do. We believe in the strength of diversity and know that unique experiences and perspectives are vital for creating truly sustainable societies. Therefore, we are committed to providing an inclusive and supportive work environment where everyone can flourish and reach their potential. We welcome

applications from candidates of all backgrounds and encourage you to contact our recruitment team to discuss any reasonable accommodations you need during the application process.

Ready to join us?

Please submit your application. Be sure to include all relevant documents including your CV and an indication of your [salary](#) expectation.

We are currently establishing a transparent salary structure at Ramboll Tech Germany. Depending on your seniority level, we have defined salary levels. We would like to talk about whether these match your expectations in your first conversation with us.

We evaluate incoming applications on an ongoing basis.

Do you have any questions? Then simply contact fabian.geier@ramboll.com

How the process will look like

Your teammates will gather all requirements within our organization. Then, once priority has been discussed, you will decide as a team on the best solutions and architecture to meet these needs. In continuous increments and continuous communication between the team and stakeholders, you're part of making data play an even more important (and understood) part withing Brand New Day.
