

Junior Data Engineer with SQL and Python

Description

Company Description

We help the world see new possibilities and inspire change for better tomorrows. Our analytic solutions bridge content, data, and analytics to help business, people, and society become stronger, more resilient, and sustainable.

Job Description

The ISO unit of Verisk is looking for a **Junior Data Engineer** to support our large team of actuaries and data analytics experts, who create innovative analytic products based on our unique database of over 21 billion records spanning more than twenty lines of insurance.

You will play a hands-on role in developing new processes, [ETL](#) solutions, and data pipelines to process large amounts of data that create a wide variety of ISO's analytic solutions, including our advisory prospective loss costs and rating factors, analyses that underlie the development of our loss costs (such as distributions by peril, classification or geographic area); actuarial projection of ultimate claims, and analysis of trends impacting premiums and claims; analytical data management, including smart data quality analytics, data aggregations provided to US state insurance regulators and analytic research & development.

A successful Junior Data Engineer will possess excellent technical and mathematical skills to manipulate data and derive analyses. Most important, though, is a sense of inquisitiveness about data and the ability not just to manipulate data but also to understand and preserve the business meaning behind it.

Qualifications

- Fluency in English is required (at least B2 spoken and written)
- Knowledge of Excel (pivot tables, formulas, conditional formatting) – optional
- Familiarity with SQL and Python (we are open for basic level users but as well as for intermediate proficiency)
- Knowledge of basic AWS Services is a plus (no prior exp needed)
- Attention to detail to follow elaborate instructions and to spot even little differences in data
- Willing to: work in a hybrid model as a full-time employee and grow within an insur-tech company
- Ability to manage competing, high-priority demands and prioritize workloads while managing projects and multiple responsibilities against strict deadlines
- Strong interpersonal/collaboration skills.

Additional Information

For over 50 years, Verisk has been the leading data analytics and technology partner to the global insurance industry by delivering value to our clients through expertise and scale. We empower communities and businesses to make better
