

## Asset Management, Business Intelligence, Analyst, London

### Description

#### MORE ABOUT THIS JOB

Goldman Sachs Asset Management Business Intelligence Analyst will contribute to leading programs by delivering business and artificial intelligence analytics initiatives. This role will combine accountability and responsibility for delivering automated solutions and business analytics, by taking advantage of artificial intelligence, process automation and data visualization tools, to generate business value.

As a business intelligence specialist, your efforts will involve providing solutions to impactful business initiatives. You will be engaging directly with business representatives and subject matter experts to drive value in line with Goldman Sachs Asset Management strategy while ensuring algorithms, low code assets, and user experience are continually improved to meet organisation growth strategy.

#### Fulfilling Your Potential

- Analyse big data and undertake exploratory data analysis while observing best practices for experimentation / analysis
- Perform data preparation, data blending, data visualisation
- Develop business intelligence applications and present outcomes
- Design indicators of business intelligence application performance and risk metrics
- Synthesize analysis results to inform business outcomes
- Identify, escalate and resolve systems and algorithm performance trends or issues
- Deliver business intelligence products in the context of your organisations change agenda
- Track and report progress on projects, adhering to the solution delivery lifecycle
- Seek information / guidance / opportunities from inside and outside of your firm / industry to corroborate outcomes
- Collaborate with other solution experts / advisors to share ideas / code through showcasing outputs

#### Basic Qualifications

- 1-3 years' experience in (1) Business Intelligence and (2) Project, Communication and Stakeholder Management
- Bachelor's degree or equivalent in Science, Technology, Engineering or Mathematics
- Relevant experience in Consumer, Financial, Social Media, FinTech
- Practitioner in business intelligence and/or artificial intelligence methodologies and their value / limitations
- Software design and application of software according to the day-to-day realities of the business
