

Junior Data analyst with SQL

Description

Company Description

We help the world see new possibilities and inspire change for better tomorrows. Our analytic solutions bridge content, data, and analytics to help business, people, and society become stronger, more resilient, and sustainable.

Job Description

The ISO unit of Verisk is looking for **Insurance Data Analysts** to support our large team of actuaries and data analytics experts, who create innovative analytic products based on our unique database of over 21 billion records spanning more than twenty lines of insurance.

You will play a hands-on role in developing new processes to create a wide variety of ISO's analytic solutions, including our advisory prospective loss costs and rating factors; analyses that underlie the development of our loss costs (such as distributions by peril, classification, or geographic area); actuarial projection of ultimate claims, and analysis of trends impacting premiums and claims; analytical data management, including smart data quality analytics, data aggregations provided to US state insurance regulators and analytic research & development.

A successful Insurance Data Analyst will possess excellent technical and mathematical skills to analyze data and derive insights. Most important, though, is a sense of inquisitiveness about data and the ability not just to work with the data but also to understand and preserve the business meaning behind it.

Qualifications

- ❓ Fluency in English (speaking and writing) is required at least C1.
- ❓ Bachelor's degree with a major in Economics, Mathematics, Statistics, or related discipline.
- ❓ Proficiency in MS Excel and working knowledge of other MS Office applications (Word, PowerPoint).
- ❓ SQL knowledge is a must-have.
- ❓ Practical experience in data creation/ transformation/ migration on large datasets (>10,000 rows).
- ❓ Willing to work in a hybrid model as a full-time employee and grow within an insur-tech company
- ❓ Optional:
 - ❓ Experience in VBA or Python or visualization tools (PowerBI or other) will be an additional asset.
 - ❓ Experience using Atlassian tools like Jira or Confluence would be a plus.
 - ❓ Ability to work with data mappings and technical requirements.
