

Sr. Business Intelligence Analyst (UK)

Description

Blackpoint Cyber is the leading provider of world-class cybersecurity threat hunting, detection and remediation technology. Founded by former National Security Agency (NSA) cyber operations experts who applied their learnings to bring national security-grade technology solutions to commercial customers around the world, Blackpoint Cyber is in hyper-growth mode, fueled by a recent \$190m series C round.

We are seeking a skilled and motivated Sr Business Intelligence Analyst to join our BI team. The ideal candidate will have a strong background in BI tools, particularly Power BI, and basic SQL knowledge. This role will focus on creating impactful dashboards and assisting business users in uncovering insights from our data. The successful candidate will be instrumental in driving data-driven decisions and providing actionable insights to support our strategic goals.
