

Divisional Data Analyst – APM

Description

Arcadis is the world's leading company delivering sustainable design, engineering, and consultancy solutions for natural and built assets.

We are more than 36,000 people, in over 70 countries, dedicated to improving quality of life. Everyone has an important role to play. With the power of many curious minds, together we can solve the world's most complex challenges and deliver more impact together.

Role description:

Reporting directly to the BA Controller in Advanced Process Manufacturing (APM) a global division within the Places Global Business Area. The successful candidate will support in providing value-adding insight and analysis to the Global Division. The candidate will work in collaborations with our high-performing local and regional finance teams, evaluating core business performance as well as internal and external investment cases and supporting data quality and consistency checks across internal reporting platforms. This role will have a focus on Business Intelligence and reporting, however also dovetail with the other APM Finance role activities to provide a resilient GBA Places FP&A Function. The dynamics in Arcadis are big. The company has ambitious growth plans, both organically and via acquisitions. This dynamic environment challenges the financial department to combine day-to-day business with continuous process improvement, integration of new entities, and due diligence of potential acquisitions. The Analyst will be part of a dedicated team of finance professionals supporting senior management in successfully moving A&U into the next growth phase.

Role accountabilities:

- Support APM finance with monthly/ quarterly divisional and BU-based management reporting.
- Support the divisional consolidation and reporting throughout forecasting/budget cycles.
- Help to provide sufficient reporting tools to support the APM finance teams and wider business in providing value-adding insight, analysis of results, improvement of working capital, and planning & forecasting analysis.
- Support business with analysis of Orderbook & Pipeline including commercial analysis and insights development.
- Support with validation and consistency of financial information across reporting platforms (OneStream, Oracle, and Power BI).
- Support finance function, both local and within GBA function to deliver best practice.
- Support in identifying areas to increase efficiency and automation of processes. • Support Growth function in areas, such as Oracle Sales Cloud, Gigafactory management/accounting, 5-year roadmap modeling, bid/pursuit support, and integration synergy analysis. • Support both FP&A & Growth teams with ad hoc analysis as required.

Qualifications & Experience:

The candidate ideally is a part-qualified accountant or equivalent by experience,
