

Data Engineer NN Re

Description

It's your ambition to build a state of the art data analytics platform. You know how to handle data.

You will automate our business processes by creating fully orchestrated data flows, taking care of the best possible data quality and providing valuable insights. You are able to identify data improvements and you know how security and compliancy are built in into our data platform.

You are a data wizard and you are able to represent NN Re towards both internal and external stakeholders, like other NN business units. You have in-depth knowledge of data analytics, data engineering and scripting, and applying these techniques in practice. You know which data solutions are available and widely used. Market developments have your specific interest and you know how to translate these into our environment. You drive data automation and data usage in the NN Re teams. You are able to create data driven reporting and to educate colleagues to make the best use of data.
