

Data Analyst

Description

About Kambi

Kambi Group plc is a leading B2B provider of premium sports betting services to licensed gaming operators. Our services provide an end-to-end solution for operators wanting to launch a standalone Sportsbook or bolster their existing offering with an innovative sports betting product. From front-end user interface to customer intelligence, risk management and odds compiling, all built on our in-house developed software, we strive to deliver the ultimate service and solution to our partners.

Our vision is to create the world's leading sports betting experiences, together with our partners.

Type of contract: permanent

Hybrid model: 2 days per week in the office

The team

Being data-driven is at the core of our brand and we are offering an opportunity for a highly motivated data enthusiast to join our Data Analytics team to expand our analytics capabilities. You will be an integral part of helping Kambi reach the growth targets set up for the coming years by maximizing the value of our data, contributing to raising the data maturity of the business and driving insight-led decision making. You will report to Head of Data Analytics. If you are a team player, passionate about data and want to make an impact, please read below and apply to us!

As a Data Analyst your day-to-day work will look like:

- Build effective relationships with internal stakeholders, primarily the Product Development function and business units, to breakdown their goals and requirements into analytical solutions
- Provide stakeholders with impactful, actionable insights that drive business decisions through data insights
- Engage creative thinking to develop analytical opportunities proactively
- Increase the organisations understanding of data through sharing and presenting findings
- Identify opportunities where data and analysis can make a positive impact
- Collaborate with other departments across the business to deliver holistic solutions

You'll be a great fit for the role, if you:

- Previous experience working in a similar role
- Advanced knowledge of SQL and Excel – data manipulation and working with large data sets
- Experience in statistical programming languages (e.g. Python, R)
- Genuine interest in data tech stack (eg. Hive, [PySpark](#), datapipeline, datalake) is meriting
- Curiosity to find insights in data, and will to educate the stakeholders on the

Kambi's ongoing commitment to Diversity and Inclusion in the workplace

If you require any reasonable adjustment during the recruitment process, please notify your recruiter, who will assist you however they can. Diversity and inclusion is at the heart of who we are and who we aim to be. While we are proud of the positive and inclusive company culture we have created, we know we can do so much more. Kambi constantly evolves its Diversity and Inclusion strategy to ensure it becomes an even more inclusive and positive place to work, with the core management team reaffirming its commitment to delivering on employee feedback.

Creating an inclusive environment

We believe Kambi's greatest strength is the collective talent of our employees. Kambi is committed to ensuring we create an inclusive work environment where everyone can feel valued, thrive and achieve their potential, regardless of who they are or what their background is. We know that it is only by having a balance of different voices, values and opinions that Kambi is able to be the market leader it is today.

#wearekambi

How the process will look like

Your teammates will gather all requirements within our organization. Then, once priority has been discussed, you will decide as a team on the best solutions and architecture to meet these needs. In continuous increments and continuous communication between the team and stakeholders, you're part of making data play an even more important (and understood) part withing Brand New Day.
