

## Data Scientist- Portugal

### Description

We are a digitally native technology services company where innovation, design and engineering meet scale. We use some of the latest technologies in the digital and cognitive field to empower organizations in every aspect.

Right now, we're looking for Data Scientist to join our team at Globant!

You will get the chance to:

- Work with professionals who have created some of the most revolutionary solutions in their fields.
- Make an impact. Work in large-scale projects globally.
- Develop your career in our Studios. Each Studio represents deep pockets of expertise on the latest technologies and trends and delivers tailored solutions focused on specific challenges.
- Develop your career within an industry or multiple industries.
- Work with product and engineering teams to understand the business problems related to place metadata, including how it's processed and stored, and define the requirements for machine learning models and algorithms to solve them.
- Automate [ETL](#) pipelines to process large databases of POIs from different sources efficiently and reliably
- Prototype, deploy, and maintain new models and algorithms for POI matching/conflation, source evaluation, identifying closed businesses, scraping metadata, extracting attributes from UGC, and flagging inaccurate data.
- Communicate progress, experimental findings, and insights clearly and concisely to both technical and business stakeholders.

What would help you succeed:

- Believe and love what you do.
- Enjoy solving problems.
- Have imagination and you love innovating.
- Being flexible & goal oriented.
- Advanced English skills.
- High performance analytics.
- Proficiency in Python, R or a similar numerical/statistical programming language.
- Ability to interpret and write complex SQL queries.
- Experience with handling data heterogeneity, incompleteness, duplication, and uncertainty issues in large datasets.

Are you ready?
