

DataOps & BI (SAP BO / PowerShell)

Description

Fincons Group is an IT business consulting company that has been designing the digital future of leading companies on international markets for 40 years. Fincons Group built its reputation on foreseeing and interpreting new business models and the rapid evolution of IT systems by building a complete range of services: from research and consulting to design and development, from system integration of leading vendor software solutions right up to application management, supporting clients step by step along their digital transformation journey. Fincons is a multinational with over 2,600 people and several offices worldwide (in Italy, Switzerland, Germany, France, the United Kingdom, Belgium and the USA), but above all, a Family Company where the founders play a strategic role with commitment and passion, grounding the company in the same principles of a united and caring family.

We firmly believe in the value of cooperation and in the contribution that every idea and intuition can bring. We believe that everyone's effort can make a difference. Transforming knowledge into a strategic resource is our company mission, and we pursue it with the help of our most strategic asset: our people.

Job Overview

For our Lugano Branch (TI) we are seeking a skilled DataOps Engineer specializing in Business Intelligence (SAP BO), PowerShell scripting and DevOps to join our team for an exciting banking project focused on System Integration. In this role, you will be instrumental in integrating external systems with our client's internal systems. If you are passionate about innovation and enjoy collaborating with diverse teams, we encourage you to apply and join our dynamic team.

Responsibilities:

- Work on software configuration and porting to ensure compatibility and seamless integration with existing systems.
- Develop and maintain PowerShell scripts for automation and system integration tasks.
- Configuration management and orchestration of software deployments.
- Leverage experience in BI and databases to enhance integration capabilities, using preferably SAP BO or other BI tools
- Implement CI/CD pipelines to facilitate efficient software delivery and deployment processes.
- Manage and troubleshoot applications.
- Collaborate closely with project teams to understand integration requirements and deliver effective solutions.
- Utilize Terraform for infrastructure provisioning and management.

Qualifications and Skills:

- Scientific bachelor's or master's degree, preferably in computer science or engineering, or equivalent work experience.
- Strong experience in PowerShell scripting is essential.
- Extensive experience in BI technologies, ideally SAP BusinessObjects (SAP
