

Data Quality Specialist

Description

What you will be doing

We are looking for a driven, talented Data Quality Specialist with expertise in data quality to help us build our SaaS-based anti-money laundering solutions, which help organisations fight financial crime! We are building cutting-edge solutions that help create a safer world and stop money from ending up in the hands of criminals. You will join the Data Quality Team, being involved in maintaining the data that the company owns for the purpose of increasing its precision and quality

As a Data Quality Specialist, you will

- Manually check data to ensure the software is working as expected
- Interrogate multiple applications to reach a resolution on an individual profile in our database
- Manually review a large number of profiles which will require attention to detail and investigative work
- Collect and update data from specific manual sources in collaboration with other teams inside the company

About you

As a Data Quality Specialist, you will

- Experience with Microsoft Excel, Access, or another database or spreadsheet application
- Good attention to detail
- Online research skills
- Great English communication skills (written and spoken)
- Secondary education (current University Students welcome)

Nice to have:

- Previous experience in a data focused role

The impact you will have

We need to ensure that we not only have data but the right data to power our anti-money laundering solutions! You will play a pivotal role in ensuring the quality and the accuracy of the data provided.

What's in it for you?

- Competitive Salary
- Equity as we want you to have a part of what we are building
- Unlimited Time Off Policy- A work-life balance and focus on our wellbeing are critical to keeping us performing at our best.
- Hybrid working- We want you to strike a balance and be where you do your best work. You will work with your manager to agree on what is best for you and your team.
- You will also get an annual budget of 1215 RON to kit out your home office

About us:

ComplyAdvantage is the financial industry's leading source of AI-driven financial crime risk data and detection technology. Our mission is to neutralise the risk of money laundering, terrorist financing, corruption, and other financial crime.

More than 1000 companies rely on us to understand the risk of who they're doing business with through the world's only global, real-time database of people and companies. Our solutions identify thousands of risk events daily from millions of structured and unstructured data points.

We have five global hubs in New York, London, Singapore, Lisbon and Cluj-Napoca and are backed by Goldman Sachs, Ontario Teachers, Index Ventures, and Balderton Capital.

Since 2014, we have raised over \$100 million in funding, and in 2022 alone grew by over 40% to over 500 people globally. Over the next 12 months, as our revenue increases, we plan to increase to 600.

At ComplyAdvantage diversity fuels our rocket ship and our commitment to inclusion across race, gender, age, religion, identity and experience drives us forward every day. We encourage everyone to apply and aspire to consider every application fairly.

We will handle your information in accordance with our Privacy Policy. For further information, please click [here](#).

How the process will look like

Your teammates will gather all requirements within our organization. Then, once priority has been discussed, you will decide as a team on the best solutions and architecture to meet these needs. In continuous increments and continuous communication between the team and stakeholders, you're part of making data play an even more important (and understood) part withing Brand New Day.
