

Senior Backend Engineer, Data Platform

Description

ClickUp is the world's only all-in-one productivity platform that flexes to the way people want to work. It replaces all individual workplace productivity tools with a single, unified platform that includes project management, document collaboration, whiteboards, spreadsheets, and AI. Our dedication to enhancing productivity has earned us recognition on prestigious lists including the Forbes Cloud 100, Fast Company's Most Innovative Companies, Inc. Power Partners and #1 on two of G2's Best Software Products Lists for 2023 – #1 Project Management Product and #1 Collaboration and Productivity Product. With our headquarters based in San Diego and a rapidly expanding global presence, we are shaping the future of work. Join our team at ClickUp, one of the fastest-growing SaaS companies worldwide, and help millions of users be more productive – saving them at least one day every week. [?]

As we accelerate our expansion in Poland, we're seeking a Senior Backend Engineer to join our Platform team! You'll be part of an exceptional, talented engineering team tasked with scaling the platform for future growth!

Our [Core Values](#) are not just a slogan! We're recruiting teammates who share our core values, know how to get sh*t done, and add to our very driven culture.

You'll have the opportunity to make significant contributions to a product used by millions, including us! You'll tackle the unique engineering challenges of rapid-growth startups, providing opportunities for learning and development along the way. Throughout this journey, you'll be backed by your team and the modern toolstack we employ.

We are offering flexible working hours, remote work, competitive [salary](#) augmented with participation in company success.

If you're the one we're searching for, don't hesitate. Apply now!

The Role:

- Own (develop and maintain) our Workspace Migration Service, including APIs, services as well as integration with 3rd party dependencies for best Customer UX.
- Contribute to the design and construction of systems that prioritize performance, reliability, and scalability.
- Understand the intricate workings of our infrastructure and how all components interact.
- Work alongside fellow engineers to deliver sophisticated backend features outlined in the roadmap.
- Challenge the status quo.
- Have fun!

Qualifications:

- An eagerness to learn.
- Strong sense of ownership and accountability.

ClickUp was founded on a culture of hard work, consistent growth, and a desire to break norms. We're a values-driven company and hire based on ambition, merit, and a willingness to do what it takes to succeed. We don't care where you're from, what you look like, or who you're in a relationship with—we hire the best people for the job, and create an environment that supports employees on their journey to do the most exciting work of their lives! ClickUp is an Equal Opportunity Employer, and qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, or national origin.

ClickUp collects and processes personal data in accordance with applicable data protection laws. If you are a European Job Applicant, see our [privacy policy](#) for further details.

Please note we are unable to sponsor or take over sponsorship of an employment visa for roles outside of engineering and product at this time. Sponsorship for engineering and product roles is not guaranteed, but is instead based on the business needs for that specific role at that time. Please reach out to the recruiter with any questions.

How the process will look like

Your teammates will gather all requirements within our organization. Then, once priority has been discussed, you will decide as a team on the best solutions and architecture to meet these needs. In continuous increments and continuous communication between the team and stakeholders, you're part of making data play an even more important (and understood) part withing Brand New Day.
