

MLOps Engineer

Description

Building machine learning production infrastructure (or [MLOps](#)) is the biggest challenge most companies currently have in making the transition to becoming an AI-driven organisation. This position is an opportunity for an innovative & curious developer to build expertise in this exciting new frontier.

Mumsnet is actively searching for a talented and experienced Machine Learning (ML) Ops Engineer to join our team to build efficient, data-driven AI products. You will play a crucial role in the development and implementation of cutting-edge artificial intelligence products, with specific focus on Large Language Model (LLM) applications

The candidate should be highly skilled in programming and have a good understanding of ML methods and statistics, with the ability to confidently assess, analyse, and organise large amounts of data. You will need to demonstrate the ability to write solid, production-quality code and enthusiasm for becoming an expert in this exciting new career.
