

## Analitik ds. Data Science

### Description

Aviva is seeking a Data Science Analyst who together with our Data Science community will be transforming Commercial Lines insurance at Aviva.

As an organisation Aviva are heavily invested in incorporating data science right across the business. From promoting data-driven insights that strengthen decision making to automating tasks that deliver efficiency savings and unlock new opportunities, Data Science is at the core.

What will you be doing?

- Development of interactive application based mostly on R (RShiny, shinydashboard)
- Data analytics and data processing
- Connectivity with external APIs
- Peer code review and unit testing of developed solutions
- Following guidelines in terms of clean code, naming convention, code version control
- Documenting introduced changes in line with instructions
- Support in migration processes

What we're looking for?

- Transferrable programming language experience such as R, Python, SQL or similar
- Dashboard development skills would be ideal, especially in R Shiny
- Analytical mindset and creative thinker/problem solver
- Organised self-starter, with drive and commitment
- Strong communication and interpersonal skills, including the ability to listen and present to non-technical audiences

In Aviva Services Excellence Centre, we provide:

- Contract of employment
- Performance Bonus
