Data Analyst

Description

Become part of the world's fastest-growing web hosting company!
Join Hostinger, where we build the best tools for anyone to easily succeed online. Our team of 900 professionals is behind the success of 2.5 million clients across 150 countries, helping them bring their e-shops, blogs, and talent-showcasing websites to life.
About Data TeamI am Arnoldas, Head of Data at Hostinger, and we're on a mission to unlock the future where decision-making is effortless, data-driven, and limitless in possibilities. Our Data Team, comprising nearly 20 top-class professionals across various data sub-teams (and continuously expanding!), embodies agility, curiosity, and a passion for challenging the status quo. We're not just analysts; we are problem solvers, focused on delivering high-impact decisions through accessible and trustworthy data.
About the RoleI am looking for a Data Analyst with sharp business acumen who is passionate about leveraging data to drive strategic decisions and solve complex business challenges. You will work on a wide range of questions and deep dive into data from various areas of our business, all while facing high expectations for quality and speed of delivery.Sounds like an exciting challenge? Let us meet you and hear all about your experience.

What You Will Do:

- Partner with stakeholders to solve business problems and unlock new opportunities through ad-hoc analysis.
- Develop and maintain dashboards and reports, providing visualizations and actionable insights for colleagues in various teams (marketing, product, finance, customer success, people).
- Collaborate closely with stakeholders to understand their data requirements and support their analysis needs.
- Utilize your expertise in SQL to write ad hoc queries, generating visualizations, answering complex questions.
- Challenge & enhance analytical methods currently used to raise the bar for quality and speed of data driven decisions & improve data literacy in organization.
- Work closely with colleagues from other data teams (Data engineers, analytics engineers) to effectively manage data analysis and projects.

What We Expect:

- Strong business acumen, ability to convert complex data into insights and actions.
- Hands-on experience working with SQL.
- Proficiency with data visualization tools (we use Tableau).
- Cutting-edge analytical thinking.
- Results-oriented mindset, communication and collaboration skills.
- At least 2-3 years of work experience in a data analyst/business analyst/finance analyst or similar position.
- Experience in Data Science field will be considered as an advantage.
