

Internship : Artificial intelligence for business – F/M

Description

[Technip Energies – Together, pushing the boundaries to shape a sustainable future](#)

Technip Energies is a leading engineering and technology company serving the energy transition, with leading positions in Liquefied Natural Gas (LNG), hydrogen and ethylene and with a strong presence in the growing markets of blue and green hydrogen, sustainable chemistry, floating offshore wind turbines and CO2 capture and storage. The company benefits from its strong project delivery model, supported by an extensive offering of technologies, products and services.

With our commitments to Diversity & Inclusion and Sustainable Development ([here](#)), with a presence in 35 countries, our 15,000 employees are fully committed to bringing our customers' innovative projects to life, pushing the boundaries of what is possible to accelerate the energy transition to a better future.

Technip Energies is a leading engineering and technology company serving the energy transition.

Missions offered:

Research activities that could be supported by AI (Artificial Intelligence) and identify the corresponding tools available on the market. The objective is to facilitate the completion of these tasks either by doing them more quickly or by doing them automatically.

The internship will consist of:

- Polls or surveys of different people working at T.EN
- A mapping of the identified activities and define those that seem most likely to be supported by AI and those where the potential for gain is the highest.
- A map of the tools available on the market with their cost
- An action plan and recommendations for the selection and use of these tools

Hiring organization

Candidate-1st

Employment Type

Full-time

Beginning of employment

asap

Job Location

Nanterre, 92-Hauts-de-Seine,
France

Working Hours

40

Base Salary

euro Flex hours

Date posted

June 2, 2024
