

Junior Machine Learning Engineer – e-Xperience 2024

Description

Job Description

A hybrid work model that incorporates solutions developed by the leader and the team.

What does this role involve

- You will join a team responsible for deployment and maintenance of Allegro Pay's ML models
- You will help in building our internal ML Platform, leveraging Azure cloud and technologies like MLFlow and Kedro
- You will use Snowflake and Airflow to manipulate massive amounts of data
- You will write lots of Python code and have it thoroughly reviewed
- You will learn how to apply the best [MLOps](#) practices

We are looking for people who

- Are fluent in Python
- Are passionate about practical applications of ML
- Have decent analytical skills and know SQL
- Are curious and eager to learn new things
- Are not afraid to challenge the status quo
- **Know English at B2+ level**

What we offer

- **A hybrid work model** that you will agree on with your leader and the team. We have well-located office (with fully equipped kitchens and bicycle parking facilities) and excellent working tools (height-adjustable desks, interactive conference rooms)
- A wide selection of fringe benefits in a **cafeteria plan** – you choose what you like (e.g. medical, sports or lunch packages, insurance, purchase vouchers)
- **English classes that we pay for**, related to the specific nature of your job
- The necessary tools for work
- Working in a team you can always count on — Allegro has best-in-class specialists and experts to learn from
- **Hackathons and an internal educational platform, MindUp** (including training courses on work organization, means of communications, motivation to work and various technologies and subject-matter issues)

Why is it worth working with us

- Big Data – several petabytes of data and Machine Learning used in production
- We practice Code Review, Continuous Integration, Scrum/Kanban, Domain Driven Design, Test Driven Development, Pair Programming, depending on the team
