

.NET Software Engineer (AI Focus)

Description

Company Description

Working at Boskalis is about creating new horizons and sustainable solutions. In a world where population growth, an increase of global trade, demand for (new) energy and climate change are driving forces, we challenge you to make your mark in finding innovative and relevant solutions for complex infrastructural and marine projects.

Job Description

Make your mark as a .NET software engineer with a focus on AI at Boskalis. In this challenging role you will be instrumental in building and optimizing AI-powered applications and services. You will work closely with other software engineers and AI specialists to integrate AI models and algorithms into our .NET applications, ensuring they are scalable, efficient, and seamlessly integrated within our business applications and Microsoft environment. Next to that you will also be responsible for the maintenance of and keeping older applications up to date.

At Boskalis we are at the forefront of integrating cutting-edge AI technologies into our (business) solutions. We leverage the power of the Microsoft OpenAI services to develop innovative products that meet our internal customers' evolving needs. Your job can be characterized as follows:

- Work in a startup like team inside a big company.
- Implement the newest technologies in (Azure) OpenAI.
- Work in a dynamic team where you can quickly make an impact by using LLMs to transform how people work.
- You like keeping up-to-date with the newest advancement in GenAI. (of LLMs).

Join us if you're passionate about making a significant impact in the tech world of Boskalis with your AI and .NET skills.

Your responsibilities as .NET software engineer

- Design, develop, and maintain AI-enhanced .NET applications using Microsoft technologies.
- Collaborate with AI researchers to integrate AI models into applications.
- Ensure applications are scalable, secure, and compliant with best practices.
- Participate in code reviews, unit testing, and integration testing.
- Stay abreast of developments in AI technologies and .NET frameworks to continually enhance our offerings.

Your qualities and experience

You can move ahead as a .NET software engineer if you have:

- A Bachelor's or Master's degree in Computer Science, Engineering, or a related field.
- Strong proficiency in .NET Framework, .NET Core, and C# programming.
