

Sustainability Junior Data Analyst

Description

Company Description

We are SGS – the world’s leading testing, inspection and certification company. We are recognized as the global benchmark for sustainability, quality and integrity. Our **99,600 employees operate a network of 2,600 offices and laboratories**, working together to enable a better, safer and more interconnected world.

Job Description

The **Sustainability Junior Data Analyst** will be part of SGS’s **Corporate Sustainability team**, tasked with integrating sustainability principles throughout the organization, collaborating closely with various functions and divisions to craft the company’s **sustainability strategy**, setting targets and ensuring its effective execution. Our strategy encompasses a diverse array of projects and initiatives spanning critical social, environmental, and governance aspects of the organization.

As a member of the **Corporate Sustainability team**, the analyst will play a vital role in developing **data analysis tools** that facilitate the **strategy’s implementation**.

Joining the **Corporate Sustainability team** at SGS offers you an opportunity to contribute significantly to the **integration of sustainability principles** throughout the organization.

Primary Responsibilities:

- Engage in the design and execution of methodologies, procedures, and tools for analyzing **sustainability data**, including:
 - **Data collection, processing, analysis, and visualization.**
 - **Identification of areas for continuous improvement.**
 - **Maintenance and regular updates of sustainability databases.**
- Support the creation of **technical documents, data visualization tools, and communication materials** to effectively communicate results and engage stakeholders (affiliates, functions, investors, etc.).
- Contribute to the preparation of precise data sets for both internal and external reporting purposes (Annual Reports, CDP, DJSI, etc.).
- Collaborate closely with cross-functional teams on a wide array of sustainability-related projects such as **energy efficiency, climate change mitigation, and human rights**.

Qualifications

- Educational background in disciplines such as **Science, Engineering, Mathematics**, or any related quantitative field is preferred. Vocational Technical Education is also considered acceptable.
- No previous experience is required but at least **1 year of work experience in data analysis** is desirable
- **Familiarity with sustainability principles** is desirable.
