Limited employment up to 6 months (f/m/d) – User Interaction Data Management

Description

Bring out your best

SAP innovations help more than four hundred thousand customers worldwide work together more efficiently and use business insight more effectively. Originally known for leadership in enterprise resource planning (ERP) software, SAP has evolved to become a market leader in end-to-end business application software and related services for database, analytics, intelligent technologies, and experience management. As a cloud company with two hundred million users and more than one hundred thousand employees worldwide, we are purpose-driven and future-focused, with a highly collaborative team ethic and commitment to personal development. Whether connecting global industries, people, or platforms, we help ensure every challenge gets the solution it deserves. At SAP, you can bring out your best.

What you'll do

- Learn: we'll give you space and time to learn new technologies (our team works with state-of-the-art Cloud technologies like Kubernetes)
- Code: above all, we love to code
- Learn what it takes to build and maintain a complex BTP Cloud Service
- Interact with and understand the different roles in product software development (Architect, Product Owner, Tech Lead, QA, Devops, etc…)
- If you want, you can explore Devops world or the QA world and see if you like it
- You won't be alone: we always help and try to work as close as possible with the new team members
- Be part of the team: party up with a highly skilled engineer team and work/learn with some of the best engineers in the software industry
- Be part of product development at SAP, where we build and deploy the next generation of SAP products

What you'll bring

- Love for software development and learning
- Java or JavaScript/TypeScript/Node.js experience or similar programming languages
- Containerization knowledge (eg: Kubernetes, Docker) is beneficial
- Git knowledge is beneficial
- Ability to speak and write English fluently is mandatory

About the team

Our team, under T&I board area, creates the latest products/services in the SAP

BTP Platform. We try to use the latest Cloud technology trends, working methods and mindset. We aim to bring the next level of technology innovation to our customers.

We are a very experienced team, we always help each other, love to bring in new people to share with us the passion of developing and creating quality software.

The project

We will be building UIDM (User Interaction Data Management), a new BTP service that will aim to help the next generation of the Intelligent Enterprise by providing AI models and other stakeholders user specific information and customization. Given the connection to SAP AI strategy this project is a major priority for SAP and BTP.

Bring out your best

SAP innovations help more than four hundred thousand customers worldwide work together more efficiently and use business insight more effectively. Originally known for leadership in enterprise resource planning (ERP) software, SAP has evolved to become a market leader in end-to-end business application software and related services for database, analytics, intelligent technologies, and experience management. As a cloud company with two hundred million users and more than one hundred thousand employees worldwide, we are purpose-driven and future-focused, with a highly collaborative team ethic and commitment to personal development. Whether connecting global industries, people, or platforms, we help ensure every challenge gets the solution it deserves. At SAP, you can bring out your best.

We win with inclusion

SAP's culture of inclusion, focus on health and well-being, and flexible working models help ensure that everyone – regardless of background – feels included and can run at their best. At SAP, we believe we are made stronger by the unique capabilities and qualities that each person brings to our company, and we invest in our employees to inspire confidence and help everyone realize their full potential. We ultimately believe in unleashing all talent and creating a better and more equitable world.
SAP is proud to be an equal opportunity workplace and is an affirmative action employer. We are committed to the values of Equal Employment Opportunity and provide accessibility accommodations to applicants with physical and/or mental disabilities. If you are interested in applying for employment with SAP and are in need of accommodation or special assistance to navigate our website or to complete your application, please send an e-mail with your request to Recruiting Operations Team: Careers@sap.com
For SAP employees: Only permanent roles are eligible for the SAP Employee Referral Program, according to the eligibility rules set in the SAP Referral Policy. Specific conditions may apply for roles in Vocational Training.

Requisition ID: 394679 | Work Area: Software-Design and Development | Expected Travel: 0 – 10% | Career Status: Graduate | Employment Type: Limited Full Time | Additional Locations: #LI-Hybrid.

How the process will look like

Your teammates will gather all requirements within our organization. Then, once priority has been discussed, you will decide as a team on the best solutions and architecture to meet these needs. In continuous increments and continuous communication between the team and stakeholders, you're part of making data play an even more important (and understood) part withing Brand New Day.
