

Program Manager (1 year), Procurement PMO & Business Intelligence

Description

ONE YEAR CONTRACT:

Our Program Managers are always thinking about the bigger picture. Every position at Amazon offers the opportunity for employees to influence business decisions and shape the future. But as a Program Manager, pioneering new ways of thinking, designing and delivering is your mission. Collaborating with a wide range of stakeholders across the business, you'll continuously be scoping out new solutions. You'll conduct your own research and analysis, always with an eye on the long-term vision of the business. This is your opportunity to have a big impact on some of the most exciting new ideas that are shaping the future of Amazon.

Key job responsibilities

- Create innovative solutions using data and research to address wider challenges in your organization.
- Take a big-picture approach in your analysis of business operations, driving improvements across a range of teams and organizations
- Work alongside senior leadership to establish and prioritize improvement programs, seeing them through from start to finish
- Enhance operational performance on every program in partnership with your stakeholders

A day in the life

As Program Manager, you'll drive and manage the implementation of creative, data-driven change in Amazon, leading improvement projects and programs. You'll use strategic thinking to define and implement an efficient and effective project plan. Program Managers have significant responsibilities, and you'll deal with complex challenges with creativity, innovation, and leadership. With a responsibility extending beyond process improvements, you could also contribute to improving other areas of the business, such diversity, equity, and inclusion.

About the team

PMO and BI Team's mission is to unlock value for 3P Procurement and Commercial development for the benefit of Amazon as a whole through activity organized under three pillars: (1) Analytics & Insights providing actionable insights to buyers/business partners through analytics, models, tools, and market intelligence; (2) Process & Control, managing the cross-functional processes, requests and inputs for defect reduction, planning and control of procurement activities; (3) Continuous Improvement & Innovation, driving continuous improvement and innovative solutions to automate the Procurement space and keep our 3P carriers engaged.

Amazon is an equal opportunities employer. We believe passionately that employing a diverse workforce is central to our success. We make recruiting decisions based on your experience and skills. We value your passion to discover, invent, simplify and build. Protecting your privacy and the security of your data is a longstanding top priority for Amazon. Please consult our Privacy Notice (https://www.amazon.jobs/en/privacy_page) to know more about how we collect, use and transfer the personal data of our candidates.

How the process will look like

Your teammates will gather all requirements within our organization. Then, once priority has been discussed, you will decide as a team on the best solutions and architecture to meet these needs. In continuous increments and continuous communication between the team and stakeholders, you're part of making data play an even more important (and understood) part withing Brand New Day.
