

Data Architect

Description

Company Description

Are you passionate about Big Data, data architectures and data mesh and want to support transitioning into a data driven organization as well as to shape our large media analytics data setups – starting with data from our own websites via social media data to third party data ? You love to communicate and enable others to go beyond the ordinary?

Then this is your chance to become part of our team. We're looking for a talented and experienced data architect, who wants to be part of this journey and act as an ambassador throughout our organization.

We, as Media Technology & IT department, are responsible for all media technology within the Red Bull Media House. We operate over a hundred different applications and tools; from our self-developed media platform to one of the most technically advanced TV studios in Europe.

Job Description

DATA & ARCHITECTURE

With your passion for (big) data and data architectures you'll collaborate closely with team members turning business needs into a proper and sustainable setup fulfilling our growing analytics demands in media business.

DATA DRIVEN ORGANIZATION

To remain successful as an organization we will continue our journey to mature as a data driven organization. In your role you act as an ambassador and will enable other teams to get there.

ENABLEMENT & GOVERNANCE

In this exciting role you can also support others by establishing best practices, patterns, tools, and guidelines to be able to create a (big) data architecture/mesh setup across our organization.

TEAM & COLLABORATION

Becoming a strong & communicative member of our department to drive our data journey by building (big) data setups and architectures as well as inspire other team members to think and evolve into this direction.
