

## Azure Solution Architect – Senior

### Description

How exhilarating would it be if you could use your technical expertise to boost business performance, grow your network, develop your desired skills and help your team innovate? Are you a mastermind at collaborating with your peers, a natural at motivating people to bring out the best in themselves and others? If so, you are tailor-made for this position!

At Candidate 1st, we prioritize your growth aspirations. We welcome everyone, at all levels, and we're committed to helping you level up in your career. We guide you to the next big thing and take control of your own career. By working with us we help you secure the most suitable job for your skills and interests. We're not about repeating the same tasks elsewhere, but rather about focusing on your professional development and enhancing your expertise. That's our mission.

Candidate-1<sup>st</sup> sees the following characteristics at the center of you, whilst we also focus on empowering you in these core values!

**Harmony** – At our core we believe harmony is within you. We find it important you feel empowered to have control over your own core and that what makes you unique is the centrepiece of your growth.

**Inspiration** – You feel inspired by being inspiring! By having the capability to inspire others you bring your core to the table.

**Trust** – We each have our identifiers for trust. We encourage every colleague to think about trust, what do you need to feel in control, what will your customers experience from your feeling of trust.

### Responsibilities

This role means you will have to have or develop your leadership qualities, you will be coached by seasoned experts but also be coaching the colleague's actively that will grow towards your role. For us this is vital in our core values to empower each and everyone to grow, this means we will reserve time for you to take that role but also to receive the coaching you want!

There is also close knit contact with customers and a pre-sales conversation about a possibly project might involve you. We believe that conversations like this should put forward subject matter experts. This gives our candidates and customers the highest quality in tandem with the requirements set by both.
