

Cloud Platform Engineer- Hybrid

Description

Our Customer is a friendly, collaborative IT service provider based in The Netherlands. Since 2012, they've been delivering international consulting and technology services to ambitious businesses and professionals, and we do it with style.

Our Customer is looking for a Cloud Platform Engineer with focus on designing and implementing cloud solutions in a collaborative agile environment. Offers opportunities for continuous growth and a hybrid work model.

- Cloud
- Nijmegen, Gelderland
- 78 employees

Responsibilities

As a Cloud Platform Engineer,

- you will design, develop, and deploy cloud solutions. Work with the latest technologies and experienced Cloud Solution Architects and Cloud Engineers.
- You will immerse yourself in private, public and hybrid cloud environments, which means that you will constantly improve your knowledge and skills.
- You will work closely with internal stakeholders and DevOps teams to implement and optimize solutions, assess customer requirements and advise on technologies and solutions.
- You will also contribute to best practices, documentation and Training.
- You will work in an agile team of software, infrastructure and data professionals. The Software Platform Team creates and maintains the platform that supports software development, deployment and operation.

Qualifications

- A Cloud Platform Engineer with experience in Azure DevOps and CI/CD pipelines, version control (Git), and scrum/agile working.
- In-depth knowledge of Azure cloud platform, services, and architectures (IaaS, PaaS, SaaS, Cloud security and networking), and experience with Infrastructure as Code (Terraform).
- Proficiency in a programming language or scripting, and good understanding of system and network architecture.
- A relevant MBO/HBO/WO education and preferably Azure certifications are essential, as is a good command of Dutch and English.
